REMARKS AND REASONS FOR ALLOWANCE

1. Note: The following change was made by an INFORMAL examiner's amendment to correct an obvious typographic error in the amendment filed 16 November 1998 on page 3, the amendment to claim 2, line 4-5 states "being [formed in the said container (3) and[isolated from one another , and the method comprises...". A careful review of the language and the text, obvious reveals that the bracket "and[" was incorrectly typed in the wrong direction. Accordingly, the examiner has changed the obvious typographic error to state "and] " .

2. The following is an examiner's statement of reasons for allowance: The claims define over the prior art whereby the invention calls for a particular combination of features of the gas flow circuit in cooperation in the container for mixing a liquid volume and sediment. The claim recites a feature of alternating a gas stream direction of pressure within a container via a conduit and passages in cooperation with the container and atmosphere which causes at least two substantially parallel flows separated by a head loss located at the lower level of the container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
